

DAVINCI RESOLVE 21+ · OGRAF TITLES

Podcast Titles Vol. 02

20 editable, animated titles. Installing takes about a minute.

1 min Install

1. **Double-click** `AGNI-Podcast-Titles-Vol-02_v1.0.0.drfx`. DaVinci Resolve opens and installs the titles. If it asks, choose **Install**.
2. **Restart DaVinci Resolve** if it was already open.
3. On the **Edit** page, open **Effects** › **Titles** › **OGraf**. You'll see **Agni_podcast 01** to **Agni_podcast 20**.

Use a title

1. Drag a title onto a video track **above** your footage.
2. Select it and open the **Inspector**. Type your text, then choose a **Colour Preset** or your own colours. You can also set alignment, position, scale and font size.
3. Pick an **Entrance Style** (Slide, Pop, Wipe) and an **Exit Style** (Slide Out, Scale Down, Wipe, Cascade).
4. Trim or extend the clip freely. The exit always finishes on the clip's last frame.

If the double-click doesn't install

1. Copy the `.drfx` file, rename the copy to `.zip`, unzip it and open `Edit/Titles/OGraf/`.
2. Copy all 40 files into the following folder (create `OGraf` if it's missing):
macOS `~/Library/Application Support/Blackmagic Design/DaVinci Resolve/Fusion/Templates/Edit/Titles/OGraf/`
Windows `%APPDATA%\Blackmagic Design\DaVinci Resolve\Support\Fusion\Templates\Edit\Titles\OGraf\`
3. Restart DaVinci Resolve.

Troubleshooting

- **The titles don't appear.** Restart Resolve and check you're on version 21 or later. Earlier versions don't support OGrat titles.
- **A title is blank.** Move the playhead into the clip. The first frame is empty by design, because the entrance starts there.
- **The exit timing is off.** In the Inspector, under **Scheduled Actions**, move or delete the **Stop** row. Re-apply the title to restore the automatic exit.
