INSTALL GUIDE / V1.0.0

# AGNI Comment FX

25 animated comment-CTA titles for DaVinci Resolve. About two minutes to set up.

1. Make sure you have DaVinci Resolve 21.1.2 or newer (DaVinci Resolve › About).
2. Unzip `agni-comment-fx_v1.0.0.zip`.
3. Double-click **AGNI Comment FX.drfx**. Resolve opens and asks to install the bundle; click **Install**.
4. Restart DaVinci Resolve.
5. On the Edit page, open **Effects › Toolbox › Titles › AGNI Comment FX** and drag a title onto a track above your footage.
6. Select the clip, open the **Inspector › OGraf › Properties** and type your keyword.

## Length and timing

The clip's length is how long the title stays on screen (5 s by default). Drag its end to change it; the exit always lands on the last frame. Every title animates in from frame 0.

## Manual install

If double-clicking doesn't work, quit Resolve and copy `Manual Install/AGNI Comment FX` into `~/Library/Application Support/Blackmagic Design/DaVinci Resolve/Fusion/Templates/Edit/Titles/` (Mac) or `%APPDATA%\Blackmagic Design\DaVinci Resolve\Support\Fusion\Templates\Edit\Titles\` (Windows).
Use one method, not both, or each title appears twice.

## Uninstall

Quit Resolve and delete `AGNI Comment FX.drfx` (or the `AGNI Comment FX` folder) from the Templates folder.

---

Every control is explained in **START HERE.html** in the download. Support: support@agni.tools. Works on macOS and Windows.
